

We all do so much online now. You can connect with loved ones across the country and around the world. So, it makes sense that window treatment design is possible from your home computer, too.

You can now start your dream project with us online. Our blinds consultants will guide you through the entire process from start to finish. Using their expertise, they will help bring your vision to life.

What does a virtual consultation look like at Blinds On Location?

1-CONTACT US

Contact us either by phone, email or by filling out our contact form. After our initial conversation, we will send you an email outlining what you need to do to prepare for your virtual consultation.

2-PHOTO & MEASURE

Take photos / measurements of your windows
We will ask that you email us photos and measurements of each window you are looking to upgrade. If you have several windows similar in size, you only need to measure one. Please email photos/measurements to info@blindsonlocation.co.nz
If you do not have a tape measure, that is ok, we can still talk through design options and show samples.

3-CONSULTATION

You and your blinds consultant will connect online through a phone or video call on your smartphone, tablet, laptop or computer for your Virtual Consultation

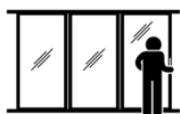

4-SHARE IDEAS

You will collaborate with your blinds consultant on your vision for your window treatments and discuss the best design for your needs. Next, your blinds consultant will review your measurements (if taken previously), or together with you, will measure your windows. Finally, we will help you narrow down options to be customised just for you.

5-YOUR QUOTE

Based on your discussions and the measurements you sent we will supply a quote for your blinds. By accepting and paying only a 20% deposit during the Lockdown period you will be eligible for our Up to 45% More for More Deal. (Note – if the measurements or fabric types you choose at your final consultation varies the price may change)

6-FINAL MEASURE

Once we are past the Level 4 Lockdown stage then we will make an appointment to visit you at home to complete a final measure and select your colours & fabrics. Our In-Home Consultants have all completed a Covid Safety Course. You will be emailed a copy of their certificate. At this time we expect that we will still be conforming to Level 3 guidelines of maintaining a social distance and having no direct contact. We will ask you a series of questions to ensure that your home is safe for them to visit. The sales consultant will have masks & gloves, for you and them to use (Consultants have their own Thermometers and check their temperature twice a day). They will have used Hand Sanitiser before entering the home. They will arrive with sanitised samples and will wipe down all surfaces they touch with Sanitizing Spray. You can choose to be in the home or on your deck while they measure.
